

Brookfield Renewable Provides Q2 Preliminary Outlook

JUN 18, 2013

June 18, 2013 – Following its announcement earlier today that it has commenced a public offering of limited partnership units (“**L.P. units**”), Brookfield Renewable Energy Partners L.P. (**TSX: BEP.UN; NYSE: BEP**) (“**Brookfield Renewable**”) has provided the following preliminary outlook for its second quarter ended June 30, 2013.

Seasonal inflows and wind conditions across the portfolio are expected to result in generation approximating long-term average (“**LTA**”) levels. Accordingly, Brookfield Renewable expects total generation in the second quarter of 2013 to approximate 6,151 gigawatt hours (GWh), as compared to LTA of 6,171 GWh, and generation of 4,101 GWh in the second quarter of 2012.

The table below summarizes expected generation by segment and region as at the date of this release:

Preliminary Outlook – Q2 2013 Generation

For the three months ended June 30	Generation (GWh)			Variance of Results	
	Preliminary 2013	Actual 2012	LTA 2013	Preliminary 2013 vs. LTA	Preliminary 2013 vs. Actual 2012
Hydroelectric generation					
United States	2,820	1,619	2,829	(9)	1,201
Canada	1,489	986	1,461	28	503
Brazil ⁽¹⁾	903	811	903	-	92
	5,212	3,416	5,193	19	1,796
Wind Energy					
United States	439	221	468	(29)	218
Canada	304	246	292	12	58
	743	467	760	(17)	276
Other	196	218	218	(22)	(22)
Total generation ⁽²⁾	6,151	4,101	6,171	(20)	2,050
				-	50%

(1) In Brazil, assured generation levels are used as a proxy for long-term average.

(2) Includes 100% of generation from equity-accounted investments.
